loveⁿcare™

“Congratulations on your new quality Love N Care product from our exclusive range of baby products. This exceptional design combines the most unique features that any baby product offers.

We are confident that you will appreciate its many highlights, including its reliability and durability. Your new product has been manufactured to comply with the Highest Quality Standards and comes with a 12-month warranty.

As you will soon learn there are many more great features about your new Love N Care product.”

WARNING:

Please retain these instructions for future reference after reading.

- The travel cot must be fully erected before use. Make sure the side rails are locked into position by pushing down on them.
- Make sure your child cannot climb over the travel cot sides. The recommended weight limit should not exceed 20kg.
- Never leave your child unattended in the travel cot.
- Do not leave cords or strings in or around the travel cot.
- Do not place the travel cot near windows, fire or other source of hazard.
- Do not place the travel cot near any electrical cords.
- Always keep the cot on level ground.
- Do not attempt to carry cot whilst child is in it.

Care & Maintenance:

- To clean the travel cot use a mild soap or household detergent and warm water.
- Wipe dry with a soft cloth only.
- The travel bag can be hand washed in warm water and hung out to dry.
- Do not use bleach or machine wash.
- If the travel cot is used on the beach you must clean all the sand off the cot legs before storing away in the bag.
- Sand in any of the rail locks can cause damage and affect the performance and safety of the lock.

To Open the Travel Cot

Remove the travel cot from its storage bag by opening the zip. The travel cot mattress is wrapped around the main body of the cot and held in position by 3 Velcro straps.

Fig:1

Fig:2

Undo the straps and release the cot. Place the four feet of the cot onto the ground and move them apart, opening out the frame.

Fig:3

Fig:4

BEFORE PUSHING THE FLOOR OF THE COT DOWN, grasp the underside of the two longest top rails and pull up until you hear them click into position. Then pull up the remaining two shorter side rails until they lock into place. If any of the rails do not lock into place (test by pushing down onto each one) make sure the floor is raised higher - the side will not lock if the floor is flat or too low down.

Fig:5

Fig:6

Once you are sure that the four top rails are locked into place, press on each of the four bottom supports in the base to make sure the floor of the cot is flat. Finally insert the mattress with the padded side facing up. Attach the Velcro to the underside of the base, thus preventing the mattress from moving.

Fig:7

Fig:8

To Fold the Travel Cot:

- Remove the mattress.
- Pull the hand strap in the middle of the base and rise to at least half way up to the top rails.
- As you pull up on the strap the bottom supports will unlock. Note: this must be done before you try to lower the arms. As a safety precaution the arms will not lower while the base is flat.

The top rails have a lock located in the centre of each rail, which is unlocked when both sides of the lock are pressed inwards. To make this easier to do follow the below steps:

- Slightly lift the arm at the same time.
- Unlock the two shortest side rails using your thumb and forefinger to press the lock in and push down.
- Now unlock the remaining top rails by depressing each side of the lock and push the rail in a downward motion.
- When all the rails are unlocked, pull up the base further, with the use of the middle handle, to its highest position.
- Compress all four sides and ensure all locks are released.
- If the travel cot will not close properly, you may need to erect the cot to enable it to unlock in the correct order .
- Wrap the mattress around the travel cot and fasten the Velcro straps.

Place into the travel bag with the carry handle facing up.
